

Shopping Basket

User Guide

Shopping Basket is an online shopping web APP. that enables to browse and purchase the products they like.

The APP. has three levels of users; speaking about those levels/types will be a good way to use guide you through the website:

1- Visitor/Guest:

- Anyone can visit the site to view the products shared through our site but they can only view them nothing else.
- But any visitor can be one of the second-level users by visiting sign up our page and filling out the form.

2- Customer:

- Once you filled out the sign up form, you will be behaved as a customer immediately. Congratulations !
- Customers have the ability to get a **basket** automatically by clicking on its icon in the NAV bar or by adding any product to basket.
- They Can add any available products to their baskets by browsing **categories** and its **products**, through the navigation bar or home page.
- Just Click on **shop** the product, determine the **quantity** needed and click **add to Basket button** which will redirect your to your basket that contains all added products.
- In your basket page you can do more actions: **Delete products** from basket by clicking on the **X button** belonging to each product, **cancel** the basket, **delete it**, and of course **purchase** the products you have by clicking their buttons bellow.
- Finally you get an invoice with the total price before and after discount and the basket will be confirmed. To do more shopping actions you will get a new basket again.

3- Admin:

The person who controls the shop. He is determined before by a specific user-name and password. He has the ability to do the followings :

- Add more categories by browsing categories via **categories button** through navigation bar and then click **create category button**.
- The admin will be redirected to a form of category data (name, code, ... etc). After submitting it, new empty category is created until products are added to it.
- Admin can delete or update old categories by viewing them and click **update/delete buttons** to do that.
- Products can be added through Add product link in NAV bar Or through the category it self via add product button. Another form is opened and the admin must fill out it.
- modifying/deleting the old products by the same in categories.
Shop product > click **update/delete buttons**.
