Shopping Basket

User Guide

Shopping Basket is an online shopping web APP. that enables to browse and purchase the products they like.

The APP. has three levels of users; speaking about those levels/types will be a good way to use guide you through the website:

1- **Visitor/Guest:** Anyone can visit the site to view the products shared through our APP. But the can only view them nothing else. But any visitor can be one of the second type users by visiting sign up our page and.

2- **Customer:** Once you filled out the sign up form, you will be behaved as a customer immediately. Congratulations !
Customers have the ability to get a basket and add products to it, by browsing the categories and its products, through the navigation bar or home page.
Just shop the product, determine the quantity needed and click add to Basket button will redirect your to your basket that contains the added products.
In your basket page you can do more actions: Delete products from basket, cancel the basket, delete it, and of course purchase the products you have and then get your invoice .
After getting the invoice, the basket will be confirmed and got a new basket to do more shopping!

3- **Admin:** The person who control the shop. He has the ability to add more categories and products and modifying/deleting the old ones.
Admin is determined before by a specific user-name and password.
